

Paul Conner
LCYDC

It was brought to my attention that Hazard Pay was taken from the Department of Corrections and that the department should have still been eligible for it. Despite vaccinations, we are still having positive cases, still doing quarantine, still wearing masks at all times, still putting on gowns, visors, etc for any new intakes and any interactions we have with new intakes for the first 14 days they are here as they're on precautionary monitoring. We are inside so we are still breathing the same circulated air. This is still a high risk environment. Thank you for your time.
