I have been involved with an inmate at MSP for about 3 years now, he's been in solitary the whole time!

They make it very difficult to have any kind of relationship, it's hard to get the phone, the texting never works right, they can only have a short visit a week. With the gentlemen that I'm involved with him, they don't want him out of solitary because they fear him. He gets treated different then all the other inmates.

Him being in solitary hasn't been easy on our relationship, not to mention his mental health!! This needs to change!
