

## Maine Department of Corrections February 2023 Data Reporting

### Current Population by Controlling Sentence

The table to the right shows the total population by controlling sentence. The 43 in the “Null” category is a result of the correctional information system not being able to determine a controlling sentence. The “Attempt” category represents several offense types where the controlling offense was attempted but not successful. Controlling offense reflects all adult facility population on March 2, 2023.

I am responding to some of Ardell's questions.

Goodtime being up to 1/3.

- Some people receive 7 days per month goodtime, which is up to 84 days per year off the sentence, which is up to 23% off the sentence.
- The majority of residents are under the 5 days a month goodtime, which is up to 60 days per year off the sentence, which is up to 16% off the sentence.

It was asked of Jeremy Pratt as to how many people were currently incarcerated for murder, and the answer is 13% of the MDOC population. This information can be found on the Maine Department of Corrections website:
