LD168 Universal Background Checks:

This looks good on its face, but the only way to enforce universal background checks is to implement a gun registry. Gun registries are unconstitutional and I do not support LD168. Our guns are none of your business. My rights do not stop because people are scared. Our second amendment rights are here to protect the scared people in the event a scarier situation were to ever happen. I would, however, support criminalizing criminals and stop making more laws criminalizing law abiding citizens.
