Mechanic Falls

I am writing to respectfully request your support for this legislation to strengthen the IEP process. As a parent that has been involved in the IEP process to biological, foster and adoptive children for over 25 years, I understand the importance of all voices being heard and respected and heard. There have been times over the years when I have not felt heard and decisions have been made for various children that I have disagreed with. I have felt like the facilitators of the IEP had already made up their minds before the meeting began as to the outcome and determinations. Thank you for your time and consideration.
