

Please remove homeschooling from the proposed bills LD 1343 and LD 1426. Homeschooling families like ours are not interested in publicly funded education. I am a certified teacher now homeschooling my children so that I can have the freedom to choose curriculum or create curriculum that I deem appropriate for my children's education. I have incredibly bright boys that I don't want held back by restricting what they can use for curriculum. Homeschooling does not belong in this bill. Thank you for removing it promptly.
