House Bill 1343 and House Bill 1426 would allow money the government has collected from taxpayers to be funneled to homeschool families. Please remove homeschoolers from these bills. As a homeschooling mom, I would like to retain freedom from government control in our homeschool, including financial contribution. Our homeschooling freedoms are very important to us and we believe families should have the right to school their children as they see fit, as long as it is within the parameters of the law. Thank you for your consideration.
