Winslow

Honorable committee members I would urge you to oppose this bill. This bill is an easy way to usher in Communist ideology. I also feel we need to teach American History not single out one race. I feel that History could be all inclusive but not just singled out as African-American History or are we going to start teaching each different cultures history separately instead of as a whole nation? Hate and division should not be the schools goal. We should be building up not tearing down our young minds. Accomplishments of every race should be honored and taught in our classes and not separated by race. So I ask you to vote "ought not to pass".
