

Julie McCarthy  
Bradford  
LD 51

In regard to LD 51, I am for restoring religious and philosophical exemptions. It is egregious that people are forced to choose between their career, or getting a vaccine. There are extenuating circumstances and various reasons why people may decide against it. Who are we to decide and demand? You are causing potential harm physically and mentally when you think you know what's best for the health and safety of all individuals not to mention, adversely impacting health care workers. Who would want to enter into that field today? It might be covid shots today, but what will it be tomorrow? They can add whatever they choose to the schedule and people will have to submit or face job loss. Governor Mills can add Covid shots to the vaccination schedule for school admittance and then what will parents whose children attend public school do? Sad world we are living in when medical freedoms are being trampled on so severely.
