

Sara Rivard  
Gray  
LD 51

Our state has decided that they know what is best for all of its citizens, without consideration for people who have differing beliefs from theirs. There is no one size fits all when it comes to medical procedures. We have removed the fundamental principal of "Our body, our choice" and "Defend a Woman's right to Choose" with the installation of LD798. IF you support either of those ideas, you must support the removal of the mandate on vaccines. If you do not see that supporting one but not the other is hypocritical, then you do not deserve to represent the people in your town, or the people in the State of Maine.

Our people should have religious freedom, they should be able to make their own choices based on their personal philosophy and beliefs. They should be required to protect their own children, and others, but allowed the ability to determine how to do this personally. The state has no business deciding what medical procedures are required and restricting the access to public institutions for non-compliance. Re-instating the religious exemption is a step in the direction toward freedom. Freedom deserves your support.
