

Heather Sprague  
Cushing  
LD 51

Dear distinguished members and Senators my name is Heather Sprague I live in Cushing. I write today in favor of LD51 I believe the covid vaccine was rushed and unsafe and is meant to control we the people. I believe fear is being used to keep that control. I have heard testimony against restoration of important exemptions to protect from children being forced out of school, medical care all because their parents dont want them jabbed with dangerous, untested and rushed vaccines that have been proven to injure and kill, especially the covid vaccines and people testifying are using fear to scare people into agreeing with them. I am a member of the Childrens Health Network, lead by Robert F Kennedy Jr a democrat that has alot of FACTS about vaccines that prove they are dangerous. I ask that you vote yes to restore religious and phylisophical exemptions and give us back our medical freedom to chose. There is no proof that if people dont get immunized a mass pandemic happens. Maybe they should stop rushing them into the public and using fear to push them. Thank you for your time.
