Dear Committee Members,

I am a homeschool parent, who was also educated at home in Maine. I value the freedom to creatively teach my children within the reasonable parameters that the state currently requires. Personally, I oppose any school choice legislation that attaches government funding to my child's education. By choosing to homeschool, I am intentionally opting out of the government system for education, and I would like to keep it that way. Please be keep home education entirely out of this bill. Thank you.
