Dear Rep. Millett and Committee,

As a friend of a family who loves someone with autism, I would like to support the proposed Grant Program to increase post-secondary educational opportunities for students with intellectual/developmental disabilities and autism. Watching my friend's loved one attain achievements unheard of 10 years ago, offering him the educational opportunities other students receive after high school is not only fair, but will help equip him for a "regular" job and give him the ability to be "more like other kids". All that's needed to help him achieve his goals is a little support - and don't all our kids need and deserve that?

Thank you for your consideration of establishing this grant.
