LD 2118

Our son is a Freshman at MSSM and his donor school is RSU 67 in Lincoln. In his first year we have seen challenges and growth like none ever educationally to date for our son. As parents, we cannot say enough positive things for the opportunity that MSSM provides a child who is identified as Gifted and Talented. In a state with many rural districts with smaller school populations it has become clear to us as parents that MSSM is an amazing experience so many donor schools can't provide for kids who need to be challenged educationally on the high-end. It solves a problem providing STEM learning opportunities unique to Maine in a uniquely Maine way.

We highly urge support of this bill.

Sincerely,  
Caitlin and Brian Sweep
