

Paul Robie
Northport

I support the Pine Tree Amendment. The importance of a clean and healthy environment should be a priority value that forms a context for every law, regulation and decision made by Maine government. We need an amendment to our state constitution to protect the environment and our community.

Our democracy is constrained by certain basic values that we hold in common that are enshrined in the constitution and in other documents such as the Bill of Rights.

The Pine Tree Amendment will articulate one of these fundamental basic values.
