

Brent Drake
Dedham

My name is Brent Drake and I am in support of LD 909. The water level of Phillips lake is a local environmental issue and in my opinion should be dealt with locally. Due to the changing environment, I feel that the residents should have more control in making the decisions that are in the best interest for Phillips lake. I also feel that the overseers have personal interests that are clouding their judgment in this issue.

Thank you for considering my comments,

Brent Drake
