Testimony Against LD 909.

Simply put, the Lucerne-in-Maine Village Corporation should not be voting at an annual meeting on the height of a dam at the outlet of Phillips Lake. This is an environmental and eco-system issue and not a political issue. One group of people will want the water level raised for easier access for boating and one group will want the water level lowered so they have more beach front. Instead of having the lake level decided every year by whichever group gets the most people to the Annual Meeting, please stop LD 909 now so it doesn't leave committee.
