

Carol Rothenberg
Waterford

Our clean lakes are a point of pride and enjoyment for the citizens of Maine and visitors to our state. Their appeal is a major driver of our economy.

I am asking that you REJECT LD1161 which will eliminate setbacks and impervious areas for restaurants for existing marinas as well as allowing new marinas to do so. Restaurants create much wastewater and require parking lots. This will compromise the zoning laws we have for lakeshore property and contribute to the declining water quality of our lakes.

Thank you for saving our lakes as we all work toward a healthy environment which brings business to our state and enjoyment to all.

Thanks for your time.
