I am writing to oppose LD 1161. Marinas should not be allowed to build restaurants right on the water, just as all other landowners can not. If this bill passes, there will be more stress on the lakes, more phosphorus run-off, and more noise and visual pollution, all in the name of a few businesses making a buck. We are already seeing more algae blooms etc. on our Maine Lakes, and this would just be a bad idea.
thank you
