York

I oppose this bill. ME, US & the world must acknowledge that fossil fuels are changing climate and this impacts all life. Renewable energy is now cheaper than energy from dirty oil sources. Some fed covid \$ in ME could be targeted to partner with regions & communities on home energy upgrades in old housing & other measures for climate & people. This bill doesn't help either! Green New Deal , creative partnerships for home upgrades... Lots of ideas. But NOT going backwards with pollution.
