

Edward Imbert  
Hardwood Products, Guilford Maine

Hello,

I am writing to express my displeasure with LD 1532. It increases penalties to the point it could cause companies to close because of the burdensome penalty fees. It also requires the input from the CDC in the permitting plan but does not clarify what their responsibility is in the approval process. It also adds 3 more standards to the approval process in our case would require input from adjacent landowners and source monitoring. This can be burdensome and costly. The bill will also will require additional renewal which is again burdensome and costly. Lastly the bill requires public notice to anyone living within 5 miles of the source this is also burdensome.

Thank-you for your time,  
Sincerely, Ed Imber
