

## Testimony in Support of LD 1532

As a fourth generation Mainer, I am hard-pressed to recall a time when our great state has so flagrantly buckled to corporate interests at the expense of our community members. The Tank Farms in South Portland are a distressing source of pollution with a direct link to deleterious effects on the health and welfare of our elementary school children and families in the surrounding area. This legislation will assist in holding those corporate interests accountable and -- as a mother and an attorney -- I can see no sustainable argument in opposition.

Thank you for the time and consideration,  
Hanna Sanders, Esq.  
South Portland, ME
