

Lorelei Cimeno
Stockton springs

I urge the committee to reject this bill. It is important to dispose of electronic wastes correctly, but it is also important to make solar panels as easily accessible and inexpensive to Maine citizens. We should remove as many barriers and fees to owning and installing solar panels as possible. In fact, we should have more rebates and incentives for them. We need to do all we can to combat climate change, and widespread use of green energy, like solar panels, is a vital part of that.
