

Diane Oltarzewski
Belfast

Co-Chairs Brenner and Tucker and Distinguished Members of the Committee on Environment and Natural Resources, my name is Diane Oltarzewski of Belfast and I write to strongly approve LD 1600. We need to do much, much more to analyze what is going on with the chemical contamination of our land and waters, so deleterious to the health and well-being of all creatures, not just humans. We hear daily of carcinogens and endocrine-disruptors poisoning us, interfering with our health and reproduction, and we simply must draw a line in favor of life! Please vote ought to pass for LD 1600.
