

LD 1541 An Act To Support and Improve Municipal Recycling Programs and Save Taxpayer Money"

Well here we go again TAX TAX TAX is there anything you won't tax . No matter how you look at this the cost will be will be past down to the consumer. I live in Sanford and we do have a recycling program of which I take part in. If a town doesn't have a plan they could be encouraged to have one not forced to'

I can remember years a similar plan was thought of when some politician thought it was a good idea to have you return your empty paint cans to the retailer that you purchased it from . Heres how that would work a truck would have to be used to collect all the empty cans and returned to the manufacturer . Truck, fuel, manpower then cleaning out the old cans more manpower add up those cost also everyone is concerned about the environment that didn't help. The program never got off first base. The taxpayer is NOT going to save any money the cost are always past on to the consumer. It is often said that the government that is closest to the people governs best Let 's keep the state out of the trash business and let the towns effectively deal with it. Please vote ought not to pass.

Thank you
