

THomas Adamo
Penobscot
LD 1979

Dear Fellow Citizens,

I would like to express my opposition to the passage of LD1979. Clean water is the lifeline for all living things. On the macro level there are part of the earth where people walk miles for enough water to sustain their lives. We in Maine are blessed with an abundance of water. The success of river protection is obvious by the improvement of the lower Kennebec and in the Penobscot. To remove this protection voluntarily is the exact reason why our federal government passed the legislation in the first place. We were unable to protect ourselves. There must be a balance that can be used to support both clean paying jobs and water quality. As a leader I respectfully request that you EITHER DEFEAT OR TABLE LD1979 AS WRITTEN until a scientific balance can be established to accomplish and sustain both water quality and employment. Thank you
