

Janet Williams  
Searsport  
LD 1979

Please vote NO on LD 1979. Maine must have the ability to set its own standards for water quality and to carry out programs to improve fish passage and the restoration of Atlantic salmon. River restoration carried out so far has been very successful in restoring fish stocks. The ability to remove old dams or create new fish passage is essential. Please do the right thing and vote NO on LD 1979.  
Thank you.
