Wayne
LD 164

Wholeheartedly and enthusiastically, I urge you to support LD 164 and help preserve the quality of Maine's precious, beautiful lakes. My family has been summer residents on Androscoggin Lake for more than 60 years and has seen the detrimental result of algae blooms and phosphorus runoffs into this lake and others. Increasing frequency of heavy rain / snowstorms is bound to challenge relentlessly the healthiness and attractiveness of Maine lakes, inviting inevitably heavy costs for cleanup.

Funds invested now on behalf of Maine lakes will pay dividends to Maine's future economy. Maine's lakes are showing the adverse effect of manmade intrusions. Please act foresightfully and correctly to give your support to LD164. Thank you!!
