

Suzanne Roy  
Auburn  
LD 1473

Please pass LD1473 to protect unfiltered water sources from becoming endangered by pollution which would then require a financial burden on residents of such municipalities required to purchase a filtration system. Developers are eager to develop and sell

Properties close to watershed areas by getting the municipalities to push the watershed boundaries closer to the lakes. Please pass LD 1473 to keep our Maine lakes' public drinking water safe for this and our next generations.
