

Allen Armstrong  
Portland  
LD 2261

Please DO NOT recommend passage of LD2261. This bill would interfere with an established bipartisan process for reducing our climate-altering emissions. Maine needs to be doing everything it can, and since motor vehicles are a major source of our emissions, we need to be encouraging the shift to plug-in vehicles. I bought an EV and a plug-in hybrid to reduce my personal emissions, and have found them the best cars I've owned in 67 years of driving.
