

Elijah Locke
Scarborough
LD 2261

Hi, my name is Elijah Locke and I'm concerned with the potential passing of bill LD2261.

Maine needs to implement clean cars standards to reach our climate goals and reduce emissions from our most polluting sector, and LD2261 is intended to second-guess the non-partisan process to implement these clean cars standards. This bill is based on misinformation about what these standards do.

I'm concerned with the future of our planet and the health of our local communities, and any deviation from our previously outlined climate goals to me signifies a shift towards more potential environmental damage.

Thanks for your consideration,
