Camden
LD 2261

The process for developing the New Motor Vehicle Emissions Rules has been long, thoughtful, and well managed. Input has been provided by the public and legislators. LD 2261 is a transparent attempt to create additional legislative hurdles by when none are needed. To re-characterizing the Emissions Rules as Major Substantive Rules would hold Maine back, slowing progress on climate action, giving Mainers fewer choices, and undermining a non-partisan process. Please do not support LD 2261 forward.
