

Michael McClellan
Raymond

Senator Lawrence, Representative Berry and members of the Energy, Utilities and Technology Committee, thank you for your service.

I write as I saw this title this morning and was compelled to speak up. Between the Covid 19 trials and our economy, it would appear that chasing legislation that is politically based is not a wise use of your time. We also can look to what just occurred in Texas given their reliance on the political desire to go "green" vs. the need for appropriate power supplies. A disaster. Your role as our state leaders is to lead us in the right direction and put aside political agendas. There may be a time down the road, electric vehicles make sense, we are not even close to that time and Maine has too many other issues to put significant time in to this now. Please vote no on LD 347.
