Support for LD 1328

It would be easy for me not to be concerned with the problem that has affected so many of my fellow Mainers because I have never received a disconnect threat from CMP. However, I have heard the stories of so many people that have dealt with this outrageous practice that I'm compelled to speak out on their behalf.

I don't understand why CMP can threaten people with something they know they can't do unless the PUC okays it. And, I don't understand why the PUC allows this. Nevertheless, they are doing it. It's unfair. It's very scary to people going through this, especially the elderly and sick. So, I guess the only solution is to go to our legislators and ask that you protect the people in Maine by supporting this act. I sincerely hope that all of you do.
