I don't understand why a new law is necessary since it has been a long standing policy/procedure for Maine residents to be protected from disconnection during the wintecmonths. Just the fact that it is being brought before the legislature shows that the owners of CMP have no knowledge or respect for the citizens of Maine and are behaving as a money hungry corporate giant. It also shows that the PUC has not been fulfilling their duties or keeping their promises. This is a moral issue; you can't legislate morality. Put a bandaid on for now, yes, but PLEASE do something to obliterate the cause of the wound so we can heal and function normally again!
