

Ernest Grolimund
Waterville

Like Clean Energy ! Wood energy is not clean. Biomass is not clean. Dirty air and energy is illegal already theoretically. But politicians are not enforcing laws still for wood some plumes commonly smeled all over Maine. This is willful blindness, another crime to go along with noy enforcing the law and negligence and aiding and abetting crimes. Etc. Safety is the supreme law. Love or care is the supreme spiritual law included in the laws of man.

And we are losing the earth in an existential crisis.

It is all basically the fault of the politicians. So politicians must stop and prevent this. Please introduce this as testimony for the clean energy bill. I do not know the details and can't come in because of co vid like I usually do.

Ernest Grolimund, retired civil engineer by education, genius IQ per Coast Guard, expert on energy per Baldacci Adm, and EPA, and ATSDR, and Sur Gen Office. Waterville, Maine. Acadia Ctr member and Green the Church member and member of other environmental groups. r
