

Jonathan Achorn
Friendship

I support LD 101, I'm a local fisherman out of Friendship. I'm very concerned about the Gulf of Maine and the effects windmills, or any power plant will have on the Gulf, it's not just about losing bottom it's the whole picture. The Gulf of Maine is not the place to be doing experiments or future industrialization. Windmills most think green, but the only thing green about them is someone will get rich. We want real research not the research done by windmill companies. You look around or talk to anyone that has windmills they're not happy. Whales along with any other sea life will be negatively affected. Look at the news whales lost beached died all with windmill ranges this is not a coincidence. Thank you I hope you vote for what's best for Maine and not the money trail thank you
