

Martin Benner
Waldoboro, Maine

To All the Representatives on This Bill:

I am a lobster fisherman and have fished for over 45 years in the Gulf of Maine. Over my lifetime, I have seen many changes but nothing that has threatened the ecosystem like the windmills and their cables will do if they are allowed to be put in our waters. Big money wants to drive fishermen out of areas they have fished for years, all for an unproven "experiment" that will cause substantial loss of income to many Maine families, because it is not just the fishermen that will be affected; everywhere they spend their money will feel the ramifications. These windmills will not benefit Maine people and I ask that you support Mainers by voting "YES" on LD101 and "NO" on LD1619.

Respectfully,
Martin Benner
