

Marie Correa  
Eliot

Dear Senator Lawrence, Representative Berry, and Distinguished Members of the Joint Standing Committee on Energy, Utilities, and Technology,

I am writing from Sen. Lawrence's District (Eliot) to ask your support of LD 101.

The Gulf of Maine nor any part of Maine can do without Windmills. They cause more kinds of pollution and they are the most inefficient way to get power.

- 1) Windmills will destroy the views of our beautiful coast.
- 2) They are noisy when they are in operation, the noise effect wildlife.
- 3) They kill Birds.
- 4) They will create much pollution installing and maintaining them, which is not worth it for the little amount of power they will give off. In other words the cost is too high for the results.
- 5) They will hurt our coastal businesses and one of our main industries fishing and lobstering.
- 6) With our weather here in Maine, did last year's Storm in Texas teach us anything.

Please Support LD 101.

Sincerely,

Marie L. Correa
