

Sheila Dassatt  
Downeast Lobstermen's Association

The Downeast Lobstermen's Association supports Rep. Faulkingham's Bill, LD 101, An Act to To Prohibit Offshore Wind Energy Development.

The Coast of Maine has had hard working families and fishermen for many generations and the windmills are a threat to our livelihoods, the protected whales and ocean birds, not to mention the threat of landfills when the turbines are laid to rest, when dismantled.

The windmills are not as green as a lot of people would like to think they are, they run on diesel fuel and are also shut off at times that they should be producing their "energy." I could go on and on, but the bottom line is, we support LD 101.
