Senator Lawrence, Representative Berry, Distinguished Members of the Joint Standing Committee on Energy, Utilities, and Technology... I am writing to ask for your support of LD 101. Wind technology is not a dependable nor a sustainable source of power. In the ocean it would certainly be an impediment to fishing, shipping, marine life and other current marine uses/life. My primary concern is the deterioration of the windmills and their removal/destruction as well as their survival in storms. Please pass this law. Thank you.
