

Matt Gilley
Harpwell

I would also like to add that I hope the rumors being circulated by some legislators that this is dead on arrival is not true and you take the time to take everyone's comment into consideration. I also ask you to consider how many individuals you heard from in favor of the bill as well as how many people speaking for multi billion dollar companies. Please remember you represent the people not the corporations. I also find it upsetting that people say this will create great paying union jobs. Is fishing not a great paying job? I love my job and just bought a house in my hometown thanks to my job. Please stand up for me and your fellow Mainers and support ld 101.
