

Jim Hanscom  
Lobster 207 and MLU

To whom it may concern, my name is Jim Hanscom I am the vice chair of the zone B council and also the Vice President of the MLU, I am writing in to today for testimony against the proposal for off shore wind development in the gulf of Maine. There are so many reasons this is WRONG!! our gulf of Maine was never meant to be industrialized or used in this manner, loss of fishing grounds the potential destruction of the ocean floor, the blatant disregard for migratory species all the while not even paying attention or acknowledging that there is absolutely nothing GREEN about wind Mills whatsoever!!! This seems like an experiment in the the gulf of Maine with guarantees on the outcome!! Why would the State of Maine be willing to take a chance on jeopardizing the fishing industry that employs so many people and contributes so money to Maine Economy? ONCE AGAIN I ASK YOU WHY?? I urge you to kill this bill once and for all and stand up for what Is right and say NO TO WIND MILLS IN THE GULF OF MAINE!!! Thank you for your consideration
