

Dillon Harvey
04572

Hi this is Dillon a 13 year old 6th generation Maine lobster with a student license I fish 100 traps out of a 30 foot boat with my Dad Shannon Harvey. Me and my dad are deeply concerned with the economic impact this windmill will have and the carbon foot print it will leave after we put it up these windmills are known to kill seabirds (puffins, seagulls, ect.) They are also known to deathen whales and other sea mammals. Like the 38 sperm whales the washed up off the coast of great Britain last summer . This windmills cabel is also going to be buried in a 10 foot by 10 foot trench that will go for 23.5 miles witch comes out to about 223 thousand tons of sediment or 0.44 billion pounds of sediment in our waters covering and suffocating ocean plants and animals on the bottom these windmills are also known to leak oil yes oil in a "green" windmill. How much oil about 600 gallons per each container. Whats gonna happen when a seal breaks in the middle of the night and 600 gallons of oil spills into our great golf of Maine . When you add all this up the negatives outway the positive so please pass LD 101 and stop the windmill Save the fisherman

Sincerely Dillon and Shannon Harvey
