

Jason Joyce  
Swan's Island

I write in opposition to Id1619 as an individual and not as a town Selectman, due to the sudden submission of said bill.

Our townspeople have not had time to react, and therefore are robbed of a right to oppose. Considering the exemptions listed in the bill this is nothing more than a thinly disguised push to promote windmills in federal waters while attempting to appease the opposition to industrialization of the Gulf of Maine, the fishermen and true mainers.

This bill is an insult to Maine's Fishing community and brings disingenuous to a whole new level.

Moments like this are what make politicians one of the least trusted entities in the country.

If your going to build back better, you shouldn't need to resort to smoke and mirrors to accomplish that.

Very disappointed with our majority party and their disregard for Maine's marine environment.

Capt. Jason Joyce

Swan's Island Selectman

Registered Maine Guide

CG Licensed Master 100 gross tons
