

Dedra Kelley
Beals Island

Good Morning,

I am writing to you on behalf of my family and the lobster fishing community. My husband is a lobster fisherman out of Beals Island as is his father, brother and uncles on both sides of his family and his grandfathers were both as well. My father and brother and grandfathers are also fishermen. We are deeply concerned and upset about the possibility of offshore wind not only destroying the ocean and life in it but also the fishermen and their families who will be directly affected by this.

We strongly urge you to not go through with the offshore wind. The Monhegan project may not directly affect our household but it does our industry. We are urging you to take into consideration the damage this will do to the ocean, the life in the ocean, the fishermen's families who use these grounds to make a living and the economy. This is not a wise thing to do.

Thank you,
The Beal Family
