

Kyle Koerber
Chebeague Island

I am in favor of banning offshore wind development for some period of time. Special interests have been railroading this project through without engagement from people in the fisheries. The answer for limited hearings was because of Covid. The process has been flawed instead of being treated as partners the Governor has treated as subjects. Offshore wind sighted in the wrong areas could have a tremendously negative impact on the entire state of Maine. I am commercial lobstermen as is my brother, my father and many of my close friends. Even if you don't fish in federal waters you will be severely impacted as gear that is offshore is moved closer. Its time our politicians started fighting for our commercial fishing communities instead of trying to sabotage us.
