

Ryan Miller  
Spruce Head

I am a longtime fisherman from spruce head Maine. I'm a 3rd generation lobsterman and I am writing this to support this bill. I feel that when Mills should not be placed in the Gulf of Maine. I feel that we do need clean energy but we need to research this more. I feel like this will disrupt the marine ecosystems precious fishing grounds that are a food source in the state and hurt our economy in the long run if we take away from lobstering. I implore the governor to consider this legislation and to find research that is backed by current windmill projects located around the world and see that these projects have created more harm then good. There are a lot of unanswered questions that need answers.
