Dear Representative,

The Cutler Board of Selectperson's are writing in support of Representative William Faulkingham's Bill LD 101 for the prohibition of the offshore wind energy development projects.

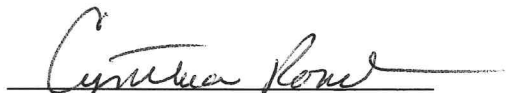

The Town of Cutler is predominately a lobster fishing community with scallop and urchin fishing activities as well. We, the Board, have great concerns about wind turbines off of our coast disrupting and perhaps destroying the livelihood of all of our fishermen locally and throughout the State of Maine as a whole.

As representatives of our fishermen and townspeople, the Board strongly supports and we are asking for you to support LD 101. We would like to see Municipal and State Representatives work together to support this Bill in hopes that we can conserve the State of Maine's great fishing industries now and for future generations.

Thank you for taking time to review our letter and to consider supporting LD 101.

Respectfully,

Cutler Selectboard

Cynthia Rowden, Chair
