

Matthew Snow
Spruce Head Island

To whom it may concern, I am a third generation lobsterman from Spruce Head Island and I would like to briefly state my support for LD 101. Offshore wind development in the Gulf of Maine greatly threatens the business I have built and am still working ever so hard to grow. I truly believe that the livelihood of my family is at stake. Not to mention the future of my children who deserve a chance at the wonderful life that can come with being a fisherman. I could go on and on but I think you get the point. Thank you for taking the time to read this.
